## Related Projects

### TravelSmart

- Led the design & development of a comprehensive, traffic-tracking software powered by the Android OS and the Google Maps API.
- Actively prototyped with students to enhance the user experience and received positive feedback on the optimizations & useful functionalities.

### Workshop Check-In

- Created a tool that offers an effective approach to tracking walk-in clients that reduce lost workshop credits for Samsung Experience Consultants.
- Recognized by the Market manager whom will push to make the app a standard nationwide.

### Image Generator

- Developed a social, user-friendly web application using JavaScript, React, and Bootstrap.
- Integrated OAuth using Firebase to provide secure access to the user's generated data.

### WorkSmart

- Directed a small team in developing an application for tracking academic tasks and progress.
- Maintained high-quality documentations during each phase of the development process.
- Attained great reviews from students who use the app to stay ahead in their classes.
