English, Filipino

Work Experience

2019-Current   **Jr. Software Developer | Spyder Technologies of VA | Herndon, VA**

- Spearheading the adoption of modern technologies on the existing web application, and actively working with managers to promote new, optimal solutions to processes.
- Managing a team in a project that employs Agile practices in a conversion effort to rebuild an integral, old module from backend to frontend.
- Creating modules that improved workflow with comprehensive UI/UX designs and saving costs to customers by providing features that previously required external spending.
- Consistently educating and supporting team members in understanding React and its available libraries and creating multiple guides and videos to facilitate the learning.

2013 - 2019   **Various Retail Positions | Samsung, Best Buy, Staples | VA**

- Communicated closely with leadership and collaborated with colleagues in achieving high sales performance in the district.
- Consistently delivered great customer experience that increased rapport and repeated sales.

Related Projects

React Wiki | reactwiki.com | Current

- A library created to facilitate the development of web applications and provide components with robust features such as generating form fields, rendering grids, and more.
- A supporting website was also created in an accessible format to outline all of the available properties for each component, including examples.

Workshop Check-In | 2018

- Created an app that offered an effective approach to tracking walk-in clients that reduce lost workshop credits for Samsung Experience Consultants.

TravelSmart | 2018

- Led the design & development of a comprehensive, traffic-tracking software powered by the Android OS and the Google Maps API.

WorkSmart | 2018

- Directed a small team in developing an application for tracking academic tasks and progress.
- Maintained high-quality documentation during each phase of the development process.
- Attained great reviews from students who use the app to stay ahead in their classes.

Education

2016 - 2018   **George Mason University | Fairfax, VA**

Bachelors in Computer Science

2013 - 2016   **Northern Virginia Community College | Annandale, VA**

A.S. in Computer Science, Electrical Engineering
